

### DESCRIPTION:

Synthetic Chain Fluid is a high temperature chain fluid formulated using virgin Group II (synthetic technology) base oils, which can be used at temperatures over 280°C. It is extremely stable at higher temperatures, having a viscosity index which maintains minimal viscosity change at elevated temperatures.

### APPLICATION:

Synthetic Chain Fluid is suitable for such applications where a high temperature fluid is required. It goes on to maintain a thin lubrication film at elevated temperatures and together with its anti-oxidant, and extreme pressure additives makes it capable of handling a high load carrying capacity.

### FEATURES AND ADVANTAGES:

- Non trip
- Ease of application.
- Allows for controlled volatility.
- No Carbon residues build up.

### PHYSICAL PROPERTIES:

COLOUR	LIGHT YELLOW
DENSITY @ 20°C	0.956 cSt
VISCOSITY @ 40°C	340 cSt
VISCOSITY INDEX	154
LOAD WEAR INDEX	46.4
EVAPORATION LOSS @ 300°C, 3 HRS	59%
FLASH POINT	250°C
